MAHSA GERAMY

FRONT-END DEVELOPER

MahsaGeramy | MahsaGeramy | mahsageramy.pr@gmail.com | +989901066416 | MahsaGeramy.ir

Summary

Front-End Developer with 4+ years of experience building scalable, SEO-friendly web applications using React, Next.js, and TypeScript, including RTL Persian interfaces. Led a front-end team and owned architecture, code review, and engineering standards. Focused on performance optimization, Core Web Vitals, automated testing, and responsive, accessible user experiences.

Skills

Languages: JavaScript (ES6+), TypeScript, HTML5, CSS3, Sass
Frameworks & Libraries: React (Server Components, Suspense), Next.js (App Router, SSR, SSG), Redux Toolkit, RTK Query, Tailwind CSS, Bootstrap
Tools: Git, GitHub, Docker, Figma, Webpack, CI/CD (GitHub Actions / Vercel)
Testing: Unit Testing, Component Testing, End-to-End Testing, Jest, React Testing Library, Playwright
Web Technologies: RESTful APIs, GraphQL, WebSocket, Browser APIs, PWA, Service Workers, Responsive Design
Performance & SEO: Core Web Vitals, Technical SEO (Front-End), Performance Optimization, Data Fetching, Accessibility (a11y)
AI-Assisted Development: Prompt Engineering, GitHub Copilot, Claude, ChatGPT, Cursor
Internationalization & Localization: RTL Layouts (Persian/Farsi), Localization (l10n), Bidirectional Text

Work Experience

Front-End Developer & Team Lead - **Pezhvak Dadeh Khazar Company** (Full-time) 09/2024 – 04/2026

- Built and led a 3-person front-end team, taking ownership of task assignment, technical interviews, onboarding, and mentoring.
- Defined front-end architecture and standards: folder structure, per-page rendering strategy (SSR/SSG/CSR), and state/data layer with Redux Toolkit and RTK Query, focused on performance and SEO.
- Ran the code review process: reviewed every pull request, enforced ESLint rules, branch naming conventions, and a standard PR template.
- Collaborated closely with Product, UI/UX, and Backend teams to define technical solutions, evaluate implementation feasibility, and deliver product features aligned with business requirements.

Front-End Developer - **Slick Foundation** (Remote) 09/2023 – 09/2024

- Built a server-side rendered e-commerce platform (Slick.gr) with React and Next.js, using SSG for product listing pages to improve load speed and SEO.
- Structured API data fetching with caching to reduce redundant requests and keep pages fast.
- Developed responsive storefront and checkout UI with Tailwind CSS for mobile and desktop.

Front-End Developer - **Darik Soft Company** (Full-time) 04/2022 – 09/2023

- Built front-end applications with React and Next.js, implementing UI features and integrating REST APIs in collaboration with the backend team.
- Contributed to product design discussions, providing technical input on UX and implementation feasibility to designers and product stakeholders.

Projects

Jamooj - **Accommodation Booking Platform**
Guest: jamooj.com | Host: host.jamooj.com

- Architected and developed three separate applications from scratch: **Guest**, **Host**, and **Admin Panel**, using **React, Next.js (App Router) and TypeScript**.
- Built and maintained customer-facing **B2C applications** serving **high-traffic workloads**.
- Optimized **Core Web Vitals** and **SEO** across the Guest and Host applications, achieving Lighthouse scores of **100 (SEO), 90 (Performance), and 90 (Accessibility)** through SSR/SSG rendering strategies, image optimization with next/image, code splitting, caching, semantic HTML, and optimized page metadata.
- Implemented **accessibility (a11y)** best practices including semantic HTML, ARIA attributes, keyboard navigation, focus management, and color contrast, validated with axe and manual keyboard testing.
- Containerized the front-end applications with **Docker**, authoring Dockerfiles for the Guest, Host, and Admin apps.
- Worked with the DevOps engineer on **GitHub Actions CI/CD pipelines** for **automated builds** and **deployments** of the front-end applications.
- Implemented **Progressive Web App (PWA)** support with a **Service Worker** that **caches requests**, improving **repeat-visit load speed**.

- Designed and implemented **responsive**, **RTL-first Persian interfaces** across Guest, Host, and Admin applications, ensuring **consistent layouts**, **Persian typography**, **number formatting**, and **bidirectional text handling**.

- Developed **reusable**, **scalable UI components** and integrated **RESTful APIs**, managing **asynchronous data flows** across application features.
- Built a comprehensive **operator/admin panel** for managing **listings**, user registrations, and **administrative workflows**.
- Wrote **end-to-end tests** with **Playwright** covering the **guest booking (reservation) flow**.

Toroo – Fruit & Fresh Produce E-commerce Platform

- Developed a full-featured RTL Persian e-commerce platform using **React, Next.js and TypeScript** featuring a **customer-facing storefront** and a comprehensive **admin dashboard** for managing business operations.
- Implemented core e-commerce features, including **product catalog, search, filtering, categorization, shopping cart, and wishlist** functionality.
- Developed end-to-end checkout workflows, including **online payment integration**, **address management**, **delivery zone selection**, **discount systems**, and order total calculations.
- Implemented **user authentication**, **account management**, and **order tracking** features.
- Developed admin dashboard modules for **product, order, pricing, inventory, warehouse, and accounting management**.
- Wrote **automated tests**: unit tests with **Jest** for order total, discount, and price-formatting logic, and component tests with **React Testing Library** for the cart, address form validation, and product filtering.
- Integrated **REST APIs** and managed **asynchronous data flows** across customer-facing and administrative interfaces.
- Built **RTL data tables**, forms, and **checkout flows** with **Persian number and currency formatting** for prices, order totals, and discounts.

POP - Integrated Electronic Services Platform

- Developed the entire front-end of an integrated electronic services platform using **Blazor, HTML, CSS, and JavaScript**.
- Designed and implemented **responsive RTL Persian user interfaces**, **reusable components**, and **interactive forms** with **input validation**.
- Integrated **REST APIs** to **retrieve, submit, and manage application data** in collaboration with the backend team.
- Developed **data tables** and **information display components** to support service-related workflows.

Education

B.Sc. in Software Engineering, Ayandeghan University 2020 – 2025
